## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Invention I in the reply filed on 06/12/2006 is acknowledged. The traversal is on the ground(s) that there is a lack of burden. This is found persuasive because the purpose of a parts feeder is to feed a surface mounting device.

The restriction requirement has been withdrawn.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 15-32 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. USPN 6,748,991. Although the conflicting claims are not identical, they are not patentably

distinct from each other because the rewording and limited added details would have been obvious to one skilled in the art at the time of invention.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-17 rejected under 35 U.S.C. 102(b) as being anticipated by Hawkswell USPN 4,687,152.

(Re claim 15) “a feeding unit installed on a main frame, the feeding unit comprising a forward and backward rotational force” (52 figure 2). “plurality of armature coils and a permanent magnetic unit” (electric motor). “a tape at a predetermined pitch interval” (38 figure 2). “a vinyl separation unit” (68 figure 2). “a vinyl recovery unit” (70 figure 2).

(Re claim 16) “vinyl separation unit utilizes rotational force generated by the feeding unit” (48 figure 2).

(Re claim 17) “vinyl recover unit is connected to the vinyl separation unit by a belt and recovers the vinyl” (76 figure 2).

(Re claim 32) “a surface mounting device” (23 figure 1).

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USPNs 5,725,140, 4,687,152 and 6,162,007.
